

Ibarakiss Strawberry Gummy

Ibaraki Prefecture 's original type of strawberry ' Ibarakiss ' is a new sweet variety with a good balance between delicious sweetness and slight acidity. As it is only produced in limited quantities, it is a truly precious strawberry variety.

We have created a two-layer gummy of strawberry jam and rich jelly so that this delicious flavour can be enjoyed all year round, even out of strawberry season. These gummies have the perfect amount of chewiness so when you bite into them you can taste the juicy strawberry jelly.

Product name	Ibarakiss Strawberry Gummy
