Tumbler Nami

Hitachi Tinware is a tinware brand produced by a foundry in T ō kai, Ibaraki Prefecture. As they are individually handmade by the craftsman, no two are the same, even down to the individual grain pattern. With its good weight, the tin ' s unique texture and how well it fits in your hand, this is an item that transforms an ordinary drink into something exceptional.
Also suitable for non-alcoholic beverages.

How to use	Additionally, it is a rather soft metal with a low melting point. It has a high thermal conductivity so if you leave it in the fridge for a few minutes the contents will get cold which can mellow its flavour. It is rust resistant, so it can be safely used as tableware. After use, please clean gently with a soft sponge and mild dish detergent.
