Dried fish

Each fish was carefully cut open and processed by professionals. Our dried goods have also been steeped in green tea. Therefore, they do not have strong smell and they stay plump and soft even when they get cold. They also have been salted, so you can grill them while they are frozen. It keeps the umami unchanged and allows you to enjoy the delicious taste. We handle various types of fish: Okhotsk atka mackerel, mackerel, splendid alfonsino, broadbanded thornyhead, blackthroat seaperch, and Japanese horse mackerel.
